Description:

A tall well proportioned, elegant male with strong bone. Although his pedigree does not point to an obvious TB producer, Nigel has had a consistent record at Herts Alpacas of throwing TB progeny from black or dark brown dams. Mandinka's fleece has a lovely handle, very bright with well defined character. A thorough recent inspection of his fleece specifically looking for white fibres failed to find any.

Sire: HER Nigel (SMBR) Dam: HER Arial (SDBR)

Nigel is the son of Rufus of Houghton (MF), and Arial is the daughter of Cedar House Long John (LSG), out of a TB dam with TB Inca bloodlines on both sides of her pedigree.

Progeny

DRE Dick Whittington (DRG) and DRE Paloma (MBR), both born in 2020.
